

International Horticultural Expos

Expo 2021 Yangzhou

The closing ceremony of Expo 2021 Yangzhou was held on 8 October in the ecological garden park of Zaolinwan Tourist Resort, in the Yangtze River Delta Region of Jiangsu province, China. There is no doubt, the coronavirus pandemic impacted, but did not deter, this major international horticultural Expo...

AIPH News

Putting sustainability at the heart of AIPH-approved Expos

We identified five thematic areas related to what we do and where we believe our Expos can make the most positive impact:

- **Climate action** – using plants and green spaces to support climate adaptation and resilience programmes in urban environment

AIPH Reporting Procedures

AIPH announces new reporting procedures using WeTrack event management software. AIPH Expos will be required to use WeTrack for reporting.

The platform enables teams and departments to track tasks and projects, collaborate better with stakeholders, and build, download, and share custom reports.

In the same platform, organisers can then integrate their

- **Biodiversity conservation** – promoting nature in cities and sustainable horticultural practices worldwide
- **Sustainable sourcing and resource management** – adopting circular economy principles, reducing plastic waste and other forms of pollution, supporting efficient production and ethical supply chain management
- **Equity & inclusion** – promoting plant growing and green spaces for all, upholding fair and equitable practices across the horticultural value chain, diversity and human rights
- **Education & awareness raising** – engaging, informing and inspiring people to appreciate the importance of plants and the places where they grow, and to take action to protect and enhance their local environment through plant growing

sustainability, readiness and operational planning, providing consistency from the early stages of planning an Expo, to the final stages of delivery.
