From all of us at AIPH, Stay safe and take care. May your Christmas sparkle with moments of love, laughter and goodwill.

Here are some of the 2021 highlights...

SUSTAINABILITY IN ORNAMENTAL HORTICULTURE

AIPH partnered with GreenTech Live & Online, the Floriculture Sustainability Initiative (FSI) and FloraCulture International (FCI) to create a virtual online international conference on 'The path to sustainability in ornamental horticulture'...

To cement our dedication to a sustainable future, we developed a new Sustainability Policy. It defines five thematic areas related to what we do and where we believe we can make the most positive impact:

- **Climate action** – using plants and green spaces to support climate adaptation and resilience programmes in urban environments
- **Biodiversity conservation** – promoting nature in cities and sustainable horticultural practices worldwide
- **Sustainable sourcing and resource management** – adopting circular economy principles, reducing plastic waste and other forms of pollution, supporting efficient production and ethical supply chain management
- **Equity & inclusion** – promoting plant growing and green spaces for all, upholding fair and equitable practices across the horticultural value chain, diversity and human rights
- **Education & awareness raising** – engaging, informing, and inspiring people to appreciate the importance of plants and the places where they grow, and to take action to protect and enhance their local environment through plant growing

We intend to measure our progress in terms of how we advance each of these themes across all our activities, and provide a source of sustainability expertise for our member associations, partners, and Expo hosts.

We initiated and conducted a Plant Health Survey in early 2021 as part of the International Year of Plant Health 2020 and in response to growing concerns about biosecurity worldwide and the ornamental horticulture industry's duty to sustainability...

AIPH represents the ornamental horticulture industry in discussions about the context and implementation of plant breeders rights, and keeps the industry informed about the latest developments, judicial consequences, and possible solutions through the AIPH Sparring Partner Group (SPG). The SPG is open to all AIPH members and affiliate members. For more information, email audrey.timm@aiph.org.

We welcomed participants from around the world to an online seminar on Novelty Protection. John McMurdy of Crop Life International presented the current state of affairs in international plant breeding, pointing out the immense differences between New Breeding Technologies (NBT) and Genetically Modified Organism (GMO), and the critical importance of distinguishing between the two techniques and the products that arise from them.

We are looking to reward nature-orientated solutions that harvest the power of plants and associated ecosystems services to help address the major challenges facing cities today – or tomorrow. Register or nominate your entry for the inaugural World Green City Awards 2022.

New Plant Breeding Technologies in Practice

City Briefings from April to December 2021. A series of one-hour webinars presenting compelling evidence and examples of the power of living green in addressing multiple challenges to city challenges.

The world examples for the power of plants
There is no doubt, the coronavirus pandemic has impacted major international events. Nevertheless, Expo 2021 Yangzhou did take place and the organisers gave a compelling final report demonstrating their overwhelming spirit of resilience...

In association with Union Fleurs, the International Flower Trade Association, we announce the 69th version of the International Statistics – Flowers and Plants 2021. It has the most comprehensive collection of production and trade data for the ornamental plants and flower industry. It is available to download for AIPH members or to purchase online for non-members.

During the 21 October General Meeting, members took part in governor elections. Elected to vice presidents were Mr Zhou Jianping of the China Flower Association and Mr Leonardo Capitanio, President of ANVE, Italy’s National Association of Nursery Stock Exporters. Members also elected Mr Martin Brijs, Production Manager, of Palmstead Nurseries Ltd, UK as Representative of Region I (Europe); Mr Andoni Gil-Gómez, Chair of the Supervisory Board of Royal FloraHolland as Representative of Region I (Europe); also re-elected Mr Ton van Boekel as Chair of the AIPH Ornamentals Production Committee. A new board member to the AIPH Board in 2021 was Mr Tim Goossens, Chair of the Board of Directors of Royal FloraHolland.

SAVE THE DATES IN 2022

International Grower of the Year Awards 2022
Unfortunately, we cannot hold the awards, planned for 25 January, at IPM Essen any more now. AIPH has been forced to change plans and is currently researching date options for announcing and celebrating the winners and we will keep you posted as soon as we have confirmed details.

AIPH Spring Meeting
We are currently making plans to hold the AIPH Spring Meeting in Dubai. Until the planned period has 7-10 March 2022. We cannot confirm these dates yet as Dubai has been forced to delay their dates. Normal procedure. The meeting will run alongside Expo 2020 Dubai.

AIPH 74th Annual Congress
We are planning to hold the 74th Annual Congress in Almere, the Netherlands from 26-30 September 2022. This will be in association with Expo 2022 Floriade Almere. This year our publication, FloraCulture International went from a bi-monthly publication to a free monthly magazine. We bring up-to-date news, leading articles and opinions, and in-depth industry analysis, interviews and features for ornamental growers, plant breeders, auction houses, floral wholesalers, florists and policymakers.
