The case studies of all 21 Finalists are available in the [AIPH Green City Case Study Collection](#).

The Technical Panel will deliver the list of 21 Finalists to the world-renowned Jury who will select the winners in the final stage of judging. The Jury will vote to select a winner in each category, as well as a Grand Winner from the list of 7 category winners. All Finalist cities will receive a Highly Commended certificate at a dedicated gala dinner and Awards ceremony, which is also the occasion at which the winners will be announced and presented their trophies. The Awards ceremony is set to take place in the City of Utrecht, the Netherlands, on 25th September 2024 as a highlight of the [Future Green City World Congress](#).

Congratulations to all 21 Finalists! AIPH and the network of partners for the AIPH World Green City Awards are thrilled to be showcasing cities who are demonstrating how they are harnessing the power of plants to shape a greener, healthier, and more resilient future.

AIPH is delighted to be collaborating with a global network of supporting partners across the globe to bring the World Green City Awards to life. These partners share a vision for shaping a greener urban future for all. Find out more about the network of partners [here](#).

If you are interested in becoming a sponsor or partner of the AIPH World Green City Awards, please email greencity@aiph.org.

Join us in celebrating these bold and inspiring urban greening initiatives by sharing the news of the announcement of the 21 Finalists with your colleagues and networks on social media.

International Association of Horticultural Producers (AIPH)

Since 1948, AIPH has united horticultural producers in an international community that thrives to this day. Much has changed in that time. Technologies advanced, cities rose from the ground, and we have become more connected than ever. As a result, our essential bond with nature has been weakened. AIPH strives to reignite and uphold an appreciation of plants that we believe is a basic human instinct. We support the work of grower associations globally and together we champion a prosperous industry, growing plants that enhance lives, advance societies, and sustain our planet, for this generation and the next.
